Notes to the Five-Year Forecast

November 2024

Introduction to the Five Year Forecast

A forecast is a snapshot of today. Based on historical trends, what we know and future assumptions. That snapshot, however, will be adjusted because the further into the future the forecast extends, the more likely it is that the projections will deviate from experience. Various events will ultimately impact the latter years of the forecast, such as state budgets (adopted every two years), tax levies (new/renewal/replacement), salary increases, enrollment variances, or businesses moving in or out of the district. The five-year forecast is a crucial management tool and must be updated periodically. The five-year forecast enables district management teams to examine future years' projections and identify when challenges will arise. This helps district management to be proactive in meeting those challenges. School districts are encouraged to update their forecasts with the Ohio Department of Education and Workforce (ODEW) when events materially change their forecast or, at a minimum when required under the statute.

In a financial forecast, the numbers only tell a small part of the story. For the numbers to be meaningful, the reader must review and consider the Assumptions to the Financial Forecast before drawing conclusions or using the data as a basis for other calculations. The assumptions are especially important to understanding the rationale of the numbers, particularly when a significant increase or decrease is reflected.

Since the preparation of a meaningful five-year forecast is as much an art as it is a science and entails many intricacies, it is recommended that you contact the Treasurer/Chief Fiscal Officer of the school district with any questions you may have. The Treasurer/CFO submits the forecast, but the Board of Education is recognized as the official owner of the forecast.

Here are three important purposes or objectives of the five-year forecast:

- (1) To engage the local board of education and the community in long range planning and discussions of financial issues facing the school district
- (2) To serve as a basis for determining the school district's ability to sign the certificate required by O.R.C. §5705.412, commonly known as the "412 certificate"
- (3) To provide a method the Ohio Department of Education and Workforce, and the Auditor of State to identify school districts with potential financial problems.

O.R.C. §5705.391 and O.A.C. 3301-92-04 require a Board of Education (BOE) to file a five-year financial forecast by November 30, and May 31, each fiscal year (July 1 to June 30). The five-year forecast includes three years of actual and five years of projected general fund revenues and expenditures. The first year of the fiscal year is considered the baseline year. Our forecast is updated to reflect the most current economic data available for the November 2024 filing.

Economic Outlook

The current economic recovery began in the fall of 2020 and remains robust through this forecast date. However, recent Federal Reserve Bank interest rate cuts foretell of a possible recession in the next six to twelve months from this forecast. The persistently high inflation that has impacted our state, country, and broader globalized

economy has slowed to an annualized rate of 2.53% in August 2024 that is down from the 40 year high of 9.1% annualized rate posted in June 2022. Costs for goods and services in FY23 and FY24 were notably impacted in areas such as capital and durable goods, diesel fuel for buses, electric, natural gas, and building materials for facility maintenance and repair. Inflation affecting district costs is expected to continue in FY25. There is some good news, the Federal Reserve is projecting inflation to be closer to their target rate of 2% by calendar year end 2024 or early in 2025. It remains to be seen if the cumulative cost increases over the past two years are transitory in goods and services or will last over the forecast period.

The Federal Reserve Bank cut Federal Fund rates In September 2024 by 50 basis points (.5%) which indicates slowing inflation and a slowing economy. Employment levels have begun to fall. The unemployment rate was 3.8% in September 2023 and rose to 4.2% in September 2024. A survey of prominent leading economists predicts there is roughly a 50% chance of a mild recession in the calendar year 2025. How this news impacts the state of Ohio's FY26 and FY27 biennium budget deliberations and actions in late spring 2025 is unknown as this forecast is filed.

The state of Ohio has enjoyed economic growth over the past three years, and the state's Rainy Day Fund balance is at \$3.7 Billion. The new state funding formula is in the fourth year of a projected six-year phase-in. While increased inflation has impacted costs across Ohio, the state's economy has grown, and many school districts received new funding in HB33 for FY24 and FY25. The ongoing growth in Ohio's economy should enable the state to finalize the last two years of the phase-in of the new funding formula in FY26 and FY27 even if a cyclical recession occurs. Regardless of a recession, the state is well-positioned to continue state aid payments to Ohio's school districts.

Since 2020 all school districts were being aided in varying degrees by three (3) rounds of federal Elementary and Secondary Schools Emergency Relief Funds (ESSER). The most recent allocation of ESSER funds must be encumbered by September 30, 2024. The loss of these funds in FY25 and future years may create a "fiscal cliff" as any ongoing costs will likely be absorbed back into the district General Fund.

Data and assumptions noted in this forecast are based on the best and most reliable data available to us as of the date of this forecast.

Forecast Risks and Uncertainty:

A five-year financial forecast has risks and uncertainty not only due to economic delays noted above but also due to state legislative changes that will occur in the spring of 2025 and 2027 due to deliberation of the following two (2) state biennium budgets for FY26-27 and FY28-29, both of which affect this five-year forecast. We have estimated revenues and expenses based on the best data available and the laws currently in effect. The items below give a short description of the current issues and how they may affect our forecast in the long term:

1. Property taxes represent a significant portion (28%) of the revenue sources for the district. The housing market in our district is stable and growing. We project continued growth in appraised values every three (3) years and new construction growth with continued modest increases in local taxes as the pandemic ends and the economy continues its recovery as anticipated. Total local revenues, which are predominately local taxes, equate to 44.98% of the district's resources. Our tax collections in the February and August of 2024 settlements showed normal collection trends. We believe there is a low risk that local collections will fall below projections throughout the forecast. Both Erie and Huron counties experienced triennial updates in tax year 2021 with collection in 2022. Both counties will experience reappraisals in 2024 with taxes payable in 2025.

Due to historic property value increases in reappraisal and update years the Ohio Legislature has considered various proposals since 2023 to help reduce non voted tax increases on taxpayers. Currently

the senate has proposed SB271 that seeks to limit growth through refund or reduction taxes to ensure annual tax growth to no more than 5% in a year. If passed by the General Assembly this will result in lowering tax increases for our residents who qualify. We are watching this legislation closely.

In addition to SB271, the legislature developed a Joint Committee on Property Taxation and Reform in 2024 in response to the historic valuation increases. Their mission is to review Ohio's property tax system and to make recommendations to the General Assembly on property taxation. The committee must report to the General Assembly by December 31, 2024. We are following any actions of the committee closely to determine what impact, if any, proposals could mean for our district to limit tax growth or to reduce taxes.

2. The state budget represented 42.16% of district revenues, which means it is a significant risk to the revenue. The future risk comes in FY26 and beyond if the state economy stalls due to a possible recession or the last two (2) years of the Fair School Funding Plan is not funded in the next state biennium budget. In this forecast, there are two unknown future State Biennium Budgets covering FY26-27 and FY28-29. Future uncertainty in the state foundation funding formula and the state's economy makes this area an elevated risk to district funding long-range through FY29. We have projected our state funding in FY25 based on the additional phase-in of HB33 (the fair school funding plan). This forecast reflects state revenue to align with the FY25 funding levels through FY29 (only note if your client agrees...they should), which we feel is conservative and should be close to what the state approves for the next two biennium budgets. We will adjust the forecast in future years as we have data to make an informed decision.
3. HB33, the current state budget, continues to phase in what has been referred to as the Fair School Funding Plan (FSFP) for FY24 and FY25. FY25 reflects 66.67% of the implementation cost at year four of a six-year phase-in plan, which increases by 16.66% each year. FY25 will result in 66.66% funding of (FSFP), however, the final two years of the phase-in are not guaranteed and are dependent on legislative actions for the FY26 and FY27 state biennium budget. The FSFP has made many significant changes to how foundation revenues are calculated for school districts and how expenses are charged off. State foundation basic aid will be calculated on a base cost methodology with funding paid to the district where a student is enrolled to be educated. We have used the September #1 foundation payments published by the Department of Education and Workforce for our forecasted revenues in FY25.
4. HB33 directly pays costs associated with open enrollment, community and STEM schools, and all scholarships, including EdChoice Scholarships. These costs are no longer deducted from our state aid. However, education option programs such as College Credit Plus continue to be removed from state aid, increasing costs to the district. Expansion or creation of programs not directly paid by the state of Ohio can expose the district to new expenditures currently outside the forecast. We closely monitor any new threats to our state aid and increased costs as new proposed laws are introduced in the legislature.
5. Labor relations in our district have been amicable with all parties working for the best interest of students and realizing the resource challenges we face. We believe as we move forward our positive working relationship will continue and will only grow stronger.

The major lines of reference for the forecast are noted below in the headings to make it easier to relate the assumptions made for the forecast item and refer back to the forecast. It should be of assistance to the reader to review the assumptions noted below in understanding the overall financial forecast for our district. Summary of Real Estate Values & Taxes – Line #1.010

Property Values are established each year by the County Auditor based on new construction, demolitions, BOR/BTA activity and complete reappraisal or updated values. Erie and Huron experienced a triennial update for the 2021 tax year that was collected in 2022. A reappraisal will be conducted in both Erie and Huron counties in tax year 2024 to be collected in 2025. We are anticipating a 5% increase in residential and a potentially larger increase for CAUV values. The district's \$ 443,000 emergency tax levy expires in December of 2024. The forecast has been adjusted to reflect the renewal.

For tax year 2021 residential property values were up largely due to an increase in sales by over six (6.02%) percent or \$ 5.54 million in assessed value. Commercial and Industrial values actually decreased by less than one (.92%) percent of \$90,180. Overall values rose \$5.45 million or 5.36%, which includes new construction for all classes of property.

Property tax levies are estimated to be collected at 97.75% of the annual amount. This allows 2.25% delinquency factor. In general, 54.20% of the Res/Ag and Comm/Ind property taxes are expected to be collected in the February tax settlement and 45.80% collected in the August tax settlement.

New Tax Levies – Line #13.030 - No new levies are modeled in this forecast.

Summary of Public Utility Personal Property – Line # 1.020

Revenues posted on this line are Public Utility Personal Property (PUPP) taxes, which are collected at the district's gross tax rate and not subject to the reduction factors. The district has been including this revenue with the real property in the previous years of this forecast. In the future, we feel that it is advantageous to track this collection separately and will be working on separating them out of the real estate collection.

Summary of School District Income Tax – Line # 1.030

The district has a 1.50% earned income tax levy. The district's school income tax represents 17% of the district's revenue. We experienced a 1% (\$ 17,201) decrease in our 2023-24 collection from the 2022-23 fiscal year but a 6.35 increase the year before. We remain optimistic that will not continue. We will assume that income from withholdings will continue in future collections. We will assume an annual growth rate of 5% for the duration of this forecast. We believe that this is a conservative estimate given the history of growth.

Summary of Unrestricted State Foundation Revenue– Line #1.035

HB33, the current state budget, continued the Fair School Funding Plan for FY24 and FY25, which funds students where they are educated rather than where they live. We have projected FY25 funding based on the September 2024 foundation settlement and funding factors.

Our district is currently a formula district in FY24 and is expected to continue on the formula in FY26-FY29 on the new Fair School Funding Plan (FSFP).

For a detailed overview of how foundation funding is calculated please visit the Ohio Department of Education and Workforce at: <https://education.ohio.gov/Topics/Finance-and-Funding/Overview-of-School-Funding>

State Funding Phase-In FY25 and Guarantees

The Fair School Funding Plan was presented as a six (6) year phase-in plan, the state legislature approved the first two (2) years of the funding plan in HB110 and extended the plan in HB33 for FY24 and FY25. The FSFP does not include caps on funding; instead, it consists of a general phase-in percentage for most components of 66.67% in FY25.

The funding formula includes three (3) guarantees: 1) “Formula Transition Aid,” 2) Supplemental Targeted Assistance, and 3) Formula Transition Supplement. The three (3) guarantees in both temporary and permanent law ensure that no district will get fewer funds in FY24 and FY25 than they received in FY21.

Future State Budget Projections beyond FY25

Our funding status for FY26-29 will depend on unknown two (2) new state budgets. There is no guarantee that the current Fair School Funding Plan will be funded or continued beyond FY25; therefore, our state funding estimates are reasonable, and we will adjust the forecast when we have authoritative data to work with. For this reason, funding is held constant in the forecast for FY26 through FY29.

Casino Revenue

On November 3, 2009, Ohio voters passed the Ohio casino ballot issue. This issue allowed four (4) casinos to open in Cleveland, Toledo, Columbus, and Cincinnati. Thirty-three percent (33%) of the gross casino revenue will be collected as a tax. School districts will receive 34% of the 33% of Gross Casino Revenue that will be paid into a student fund at the state level. These funds will be distributed to school districts on the 31st of January and August each year, beginning for the first time on January 31, 2013.

The casino revenue has recovered from the pandemic from closing the casinos in 2020. Total funding in FY23 was \$113.1 million or \$64.90 per pupil. In FY24, the funding totaled \$114.18 million or \$65.44 per pupil. We expect the Casino revenues to have resumed their historical growth rate and are assuming a 1.5% annual growth rate for the remainder of the forecast.

Restricted State Aid (Line # 1.040)	\$683,130	\$619,430	\$619,430	\$619,430	\$619,430

Summary of Restricted State Foundation Revenue– Line #1.040

HB33 has continued Disadvantaged Pupil Impact Aid (formerly Economic Disadvantaged funding) and Career Technical funding. In addition, new restricted funds have been added under “Restricted Categorical Aid” for Gifted, English Learners (ESL), and Student Wellness. We have estimated revenues for these new restricted funding lines using current October funding factors. The amount of DPIA is limited to a 66.67% in FY25. We have flat-lined funding at FY25 levels for FY26-FY29 due to uncertainty on continued funding of the current funding formula.

HB33 set aside funds state-wide to subsidize the Science of Reading initiative. The district will be reimbursed for teacher in-service and associated fringe benefits upon proof of training and certified reimbursement request.

It is estimated that the district will receive \$ 63,700.00 from this one-time subsidy in FY25 and is required to maintain documentation as to how the funds were spent.

ESTIMATED FEDERAL AID (LINE # 1.040)

No federal unrestricted grants are projected FY23-27.

ESTIMATED ROLLBACK & HOMESTEAD REIMBURSEMENT (LINE # 1.050)

<u>Source</u>	<u>FY25</u>	<u>FY26</u>	<u>FY27</u>	<u>FY28</u>	<u>FY29</u>
Rollback and Homestead	\$348,330	\$382,117	\$391,865	\$407,313	\$428,937
State Share of Local Property Taxes (Line # 1.050)	\$348,330	\$382,117	\$391,865	\$407,313	\$428,937

Rollback funds are reimbursements paid to the district from the State of Ohio for tax credits given to owner-occupied residences. Credits equal 12.5% of the gross property taxes charged to residential taxpayers on levies passed before September 29, 2013. HB59 eliminated the 10% and 2.5% rollback on new levies approved after September 29, 2013.

Homestead Exemptions are credits paid to the district from the state of Ohio for qualified elderly and disabled. In 2007, HB119 expanded the Homestead Exemption for all seniors 65 years or older or disabled, regardless of income. Effective September 29, 2013, HB59 changed the requirement for Homestead Exemptions. Individual taxpayers who still need to get their Homestead Exemption approved or those who did not get a new application approved for the tax year 2013 and who become eligible after that will only receive a Homestead Exemption if they meet the income qualifications. Taxpayers who had their Homestead Exemption as of September 29, 2013, will not lose it and will not have to meet the new income qualification. This will generally reduce homestead reimbursements to the district over time, and as with the rollback reimbursements above, the state is increasing the tax burden on our local taxpayers.

ESTIMATED ALL OTHER REVENUE (LINE # 1.060)

<u>Source</u>	<u>FY25</u>	<u>FY26</u>	<u>FY27</u>	<u>FY28</u>	<u>FY29</u>
Tuition Related Payments	\$124,229	\$126,714	\$129,248	\$131,833	\$134,470

Total Other Local Revenue Line #1.060	\$919,879	\$930,310	\$940,910	\$951,682	\$962,629

Summary of Other Local Revenues – Line #1.060

All other local revenue encompasses any revenue that does not fit the above lines. The primary sources of revenue in this area have been open enrollment, interest on investments, tuition for court-placed students, student fees, Payment In Lieu of Taxes, and general rental fees. HB110, the previous state budget, stopped paying open enrollment as an increase to other revenue for the district. Open-enrolled student revenues are now included in Line 1.035 as part of the basic state aid.

Interest income is based on the district's cash balances and increased interest rates due to the Federal Reserve raising rates to curb inflation. The Federal Reserve Bank cut interest rates by 50 basis point in September 2024. While interest income in FY25 should remain steady due to laddered investment strategies, the rate cuts will begin

to have an impact on earnings in FY26 and future years. We will continue to monitor the investments for the district. All other revenues are expected to continue historical trends.

ESTIMATED SHORT-TERM BORROWING (LINE # 2.010 & 2.020)

There is no short-term borrowing projected in this forecast.

ESTIMATED TRANSFERS & ADVANCES (LINE # 2.040 & Line #2.050)

Total Transfer & Advances In	\$0	\$0	\$0	\$0	\$0

Summary of Transfers & Advances - Line # 2.040 & 2.050

Advances are non-operating revenues which are the repayment of short-term loans to other funds over the previous fiscal year and reimbursements for expenses received for a previous fiscal year in the current fiscal year. Transfers are permanent in nature and are not intended to be returned to the original fund.

ESTIMATED ALL OTHER FINANCIAL SOURCES (LINE # 2.060)

All Other Financing Uses - Line #5.030	\$0	\$0	\$0	\$0	\$0

Summary of All Other Financial Sources – Line #2.060

This funding source is typically a refund of prior year expenditures that is very unpredictable. We received several Bureau of Workers Compensation refunds over the past two years and do not expect to receive a refund in FY24. These revenues are inconsistent year to year and we will not project that occurring in the remainder of the forecast.

Expenditure Assumptions

General Fund Operating Expenditures

Fiscal Year 2024-25

The district's leadership team is always looking at ways to improve the education of the students whether it be with changes in staffing, curriculum, or new technology needs. As the administration of the district reviews expenditures, the education of the students is always the main focus for resource utilization.

Summary of Salaries & Wages – Line #3.010

Negotiations with the certified staff resulted in an agreement to include base increases of 6% for FY2025, 5% for FY2026 and 4% for fiscal year 2027. Negotiations with the classified staff resulted in an annual increase of approximately \$ 80,000 annually. Based on a historical analysis, we have projected salary adjustments of two (2.0%) percent for years four and five of the forecast.

Summary of Fringe Benefits – Line #3.020

This area of the forecast captures all costs associated with benefits and retirement costs. These payments along with HSA costs are included in the table below.

A) STRS/SERS will increase as Wages Increase

As required by law, the BOE pays 14% of all employee wages to STRS or SERS.

B) Insurance

The district is on a self-insured medical insurance plan. FY24 saw an increase in insurance rates and enrollment of 15.9%. We are estimating an increase of 11% for FY25, 12% in FY26, 13% in FY27, 14% for FY28 and 14% for FY29. This assumption is based on claims data history and enrollment trends.

The Further Consolidated Appropriations Act of 2020 included a full repeal of three taxes originally imposed by the Affordable Care Act (ACA): the 40% Excise Tax on employer-sponsored coverage (a.k.a. “Cadillac Tax”), the Health Insurance Industry Fee (a.k.a. the Health Insurer Tax), and the Medical Device Tax. These added costs are no longer an uncertainty factor for our health care costs in the forecast.

C) Workers Compensation & Unemployment Compensation

Workers Compensation is expected to be approximately .038% of wages FY24– FY28. Unemployment is expected to remain at a very low level FY24– FY28. The district is a direct reimbursement employer, which means unemployment costs are only incurred and due if we have employees who are eligible and draw unemployment.

D) Medicare

Medicare will continue to increase at the rate of increases in wages and as new employees are hired. Contributions are 1.45% for all new employees to the district on or after April 1, 1986. These amounts are growing at the general growth rate of wages.

Summary of Purchased Services – Line # 3.030

HB110, the previous state budget, impacted the purchased services beginning in FY22 as the Ohio Department of Education began to direct pay these costs to the educating districts for open enrollment, community, and STEM schools, and for scholarships granted students to be educated elsewhere, as opposed to deducting these amounts from our state foundation funding and shown below as expenses. College Credit Plus, excess costs and other tuition costs will continue to draw funds away from the district, which will continue in this area and have been adjusted based on historical trend. Special needs services that are contracted with North Pointe ESC along with utilities remain the major portion of this area of the budget. We have projected, based on the historical trend and incorporating ESSER expenses back into this budget at five (5%) percent.

In FY26 there will be a new electric Capacity Charge that will be assessed on all electric bills to help expand Ohio's electric generating ability. This charge will begin June 2025 and end June 2026. It is anticipated it will increase electric costs by 20% annually for just that twelve (12) month period.

Operating Expenditures

Actual FY2022-24 and Estimated FY2025-29

As the graph on the following page indicates, we have been diligent at containing costs in reaction to lower and flat state revenues in the past. We are maintaining control over our expenses while balancing student academic needs to enable them to excel and do well on state performance standards.

ESTIMATED UNENCUMBERED CASH BALANCE (LINE 15.010)

	<u>FY25</u>	<u>FY26</u>	<u>FY27</u>	<u>FY28</u>	<u>FY29</u>
Ending Unreserved Cash Balance Line #15.01	\$3,500,331	\$3,794,216	\$3,687,374	\$3,029,828	\$1,944,735

Summary of Ending Unencumbered Cash Balance “The Bottom-line”– Line#15.010

This amount must not go below \$0 or the district General Fund will violate all Ohio Budgetary Laws. Any multi-year contract which is knowingly signed which results in a negative unencumbered cash balance is a violation of 5705.412, ORC punishable by personal liability of \$10,000. It is recommended that a district maintains a minimum of thirty (30) day cash balance, which is approximately \$ 664,000 for our district.

Another way to look at ending cash is to state it in ‘True Cash Days’. In other words, how many days could the district operate at year end if no additional revenues were received. This is the Current Years Ending Cash Balance divided by (Current Years Expenditures/365 days) = number of days the district could operate without additional resources or a severe resource interruption. The government finance officers association recommends no less than two (2) months or 60 days cash is on hand at year-end but could be more depending on each districts complexity and risk factors for revenue collection. This is calculated including transfers as this is a predictable funding source for other funds such as capital, athletics, and severance reserves.
